

Significantly reduce your HVAC runtime & system payback period with

Verdant EI™ Energy Management Optimization Service

What is Verdant EI™ ?

Verdant EI™ is a ‘do it for me’ energy management optimization service that delivers consistent savings without compromising guest comfort.

Maximized Energy Savings all Year Round

Verdant’s EI™ experts continuously finetune your room settings to optimize your system’s performance and maximize savings.

No Staff Involvement

Leave your Verdant system operations in the hands of our energy experts so that your staff can focus on other operational tasks.

Lifetime Warranty

Verdant EI™ includes a lifetime hardware warranty, software updates, and rolling attic stock, so you’ll never need to buy another thermostat again.

How it works

PHASE 1: Initial Setup

In this phase, an energy management expert will be assigned to your property and assist you with:

- | Hardware installation training & orientation
- | System troubleshooting and commissioning
- | Understanding of customer’s needs & delivery of tailored system settings

PHASE 2: Fine-tuning

Your energy expert will remotely manage your energy management system, including:

- | Monitoring of system operations
- | Sending of weekly KPI reports
- | Constant optimization of energy savings settings

PHASE 3: Ongoing Optimization

Your energy expert will continuously monitor and adjust your energy management system :

- | Regular monitoring & settings optimization based on humidity and seasonal settings changes
- | Maintain online room status
- | Regular technical assistance, timely diagnostic alerts & HVAC system health reports

Monitor Your HVAC System from Anywhere

Verdant EI™ includes a cloud-based dashboard and smartphone app to help you monitor your property in real-time and change unoccupied settings on the fly:

SAVINGS DASHBOARD

Login to your portal and monitor your real-time or historical savings data. If you manage various properties, segment your savings by property, brand, size, etc.

ROOM OCCUPANCY

Allow your maintenance staff to identify any room requiring special attention. It also gives your housekeeping staff real-time occupancy status eliminating guest disruptions while cleaning rooms.

OPERATIONS

See each thermostat laid out on your floor plan and check current room temperature. Instantaneously adjust each room's setpoint when rooms are unoccupied and monitor humidity levels to prevent guest complaints.

USER MANAGEMENT

Easily add & remove staff access and adjust user permissions for each of your properties.

Eligible for a utility rebate?*
With Verdant EI™, we handle the process for you, free of charge.
